Brand Guidelines.

Visual identity system

Version 2.0 · October 2026

Code with the right people.

Contents

This guide defines how DevSync looks and sounds. Use it as the single reference for design, product, marketing and partner work.

00 Introduction 03

01 Logo 04

02 Color 10

03 Typography 13

04 App icon & favicon 16

05 Interface components 19

06 Voice & tone 22

Our brand

DevSync connects developers with the open-source projects and people that fit them, so good work gets built together.

01

Match

Pairing is based on stack, interest and availability. Every suggestion should feel considered, never random.

02

Review

Trust is built in the open. Scores, tags and recent activity are visible so people can decide quickly.

03

Merge

Two paths become one. The product exists to turn separate effort into shared, shipped work.

HOW TO USE THIS GUIDE

Follow the rules as written. They are deliberately few. Where a case is not covered, choose the option that is simpler, calmer and uses less color.

Master logo files and favicons ship alongside this document. Never redraw or approximate them.

01

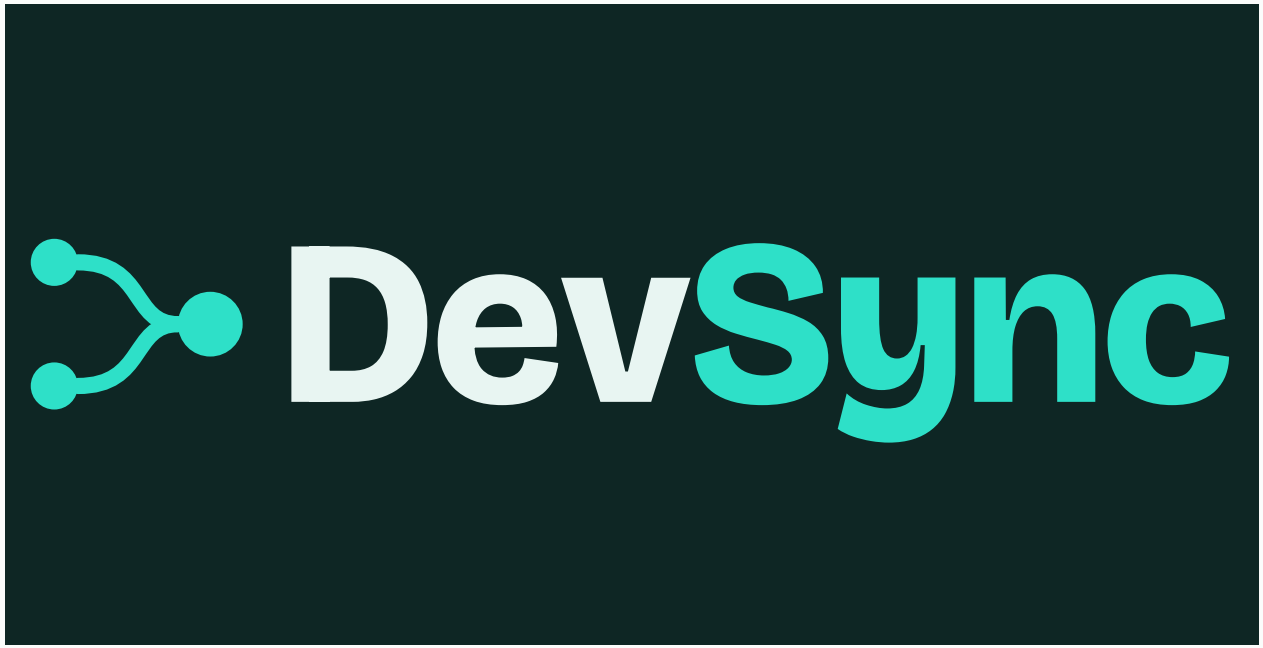

Logo

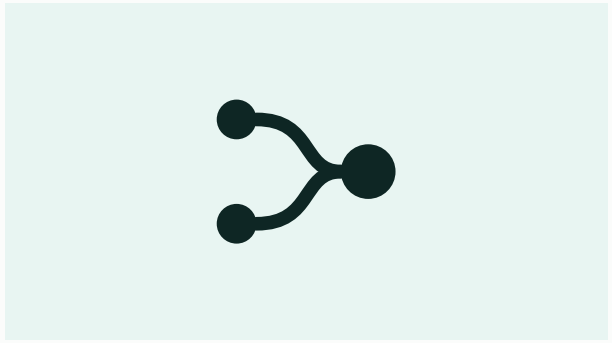

The symbol and the lockup: when to use each, how to protect them, and what not to do.

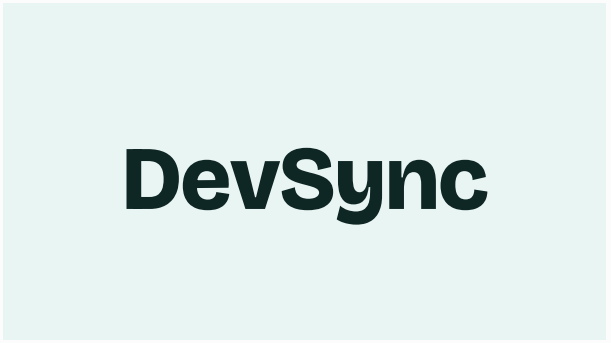

Primary logo

The lockup combines the symbol with the wordmark. It is the default signature wherever there is room.

THE LOCKUP

Symbol and wordmark are fixed in proportion. On dark backgrounds “Dev” is Mint and “Sync” is Teal. On Teal and light backgrounds the whole lockup is Forest.

THE SYMBOL

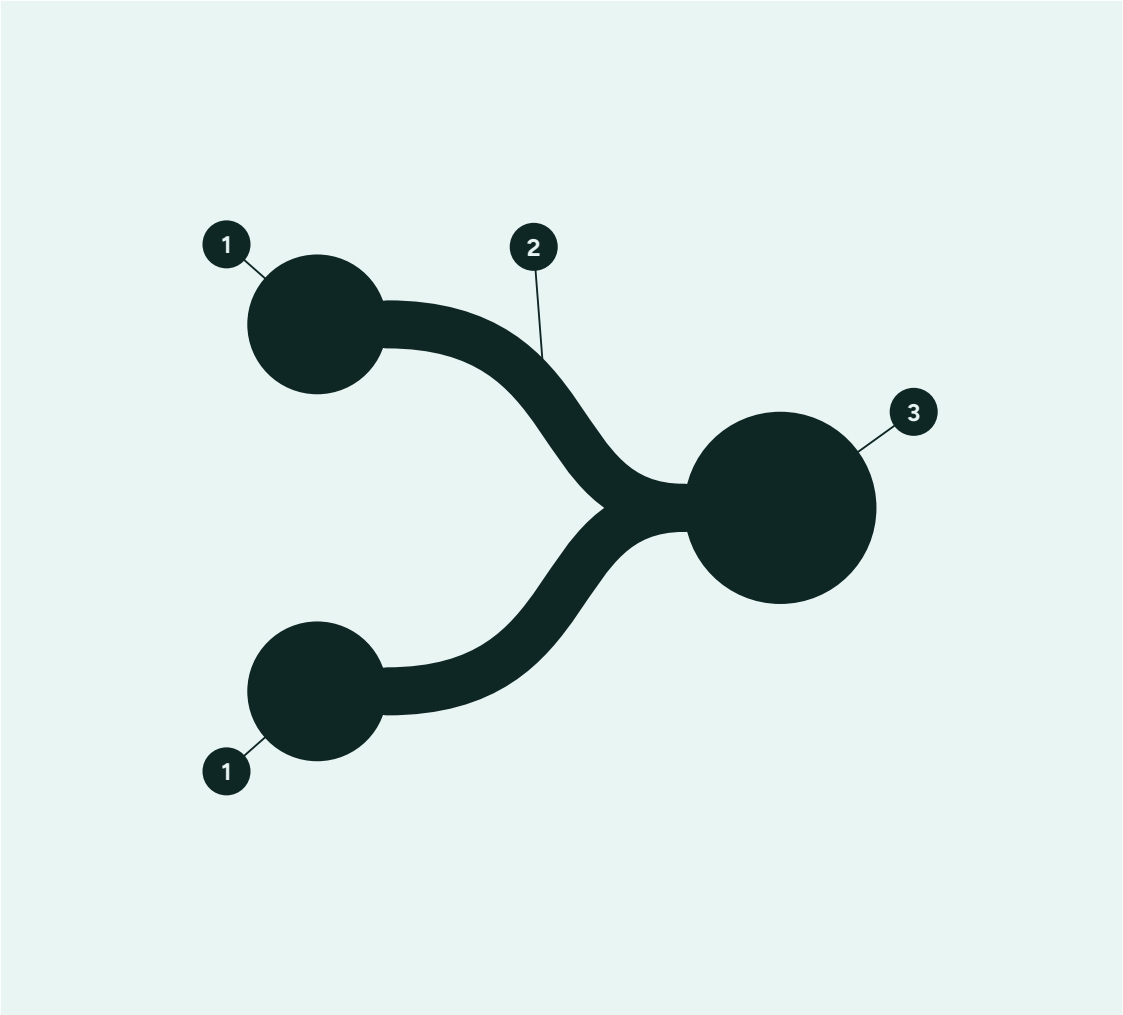

Use alone where space is tight: app icons, favicons, avatars and notification badges.

THE WORDMARK

Set in Bricolage Grotesque ExtraBold with slightly tightened tracking. Never retype it in another face.

Anatomy

Two paths merge into one node: collaboration in its simplest form.

1 Two small nodes

Individual developers: the people who come to DevSync looking for the right project or collaborator.

2 Merging paths

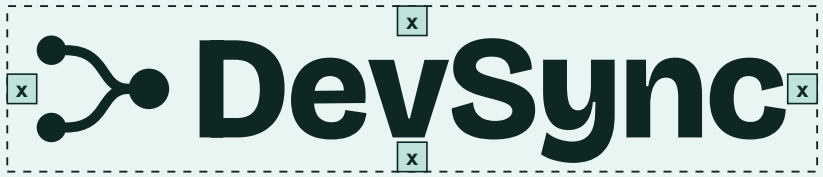

The matching and review process. Both paths curve into the same point, so neither side leads.

3 Large node

The shared project. It is the largest element because the outcome matters more than either starting point.

Clear space & minimum size

Give the logo room to breathe and never reproduce it below the minimum sizes.

x = diameter of one small node

CLEAR SPACE

Keep an area equal to x free on every side. Nothing else enters this zone: no text, edges, images or other logos.

MINIMUM SIZE

Shown at actual size on screen (1 px = 1 pt).

Symbol 16 px / 5 mm

DevSync Lockup 96 px / 25 mm

In very small spaces such as browser tabs, avatars and notification badges, use the symbol on its own rather than shrinking the lockup.

Colorways

Four approved versions. Choose by background; never mix them.

Primary — On Forest or Surface

On Teal — Campaigns, highlights

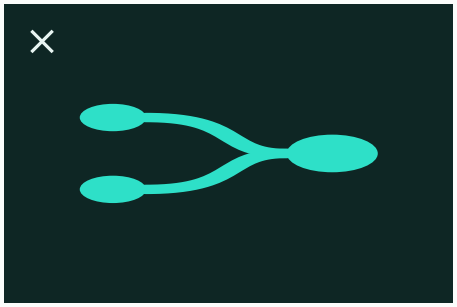

On Mint — Light product surfaces

On white — Documents and print

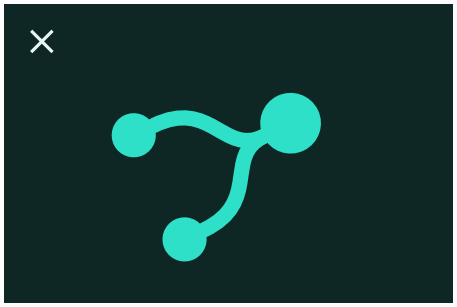

Logo misuse

Keep the mark consistent everywhere it appears.

01

Don’t stretch or squash

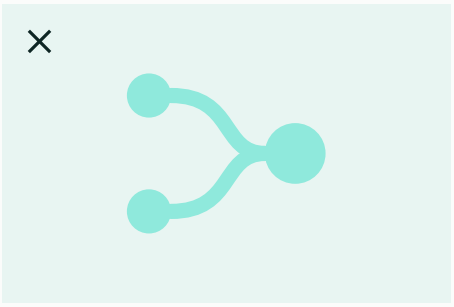

02

Don’t rotate or tilt

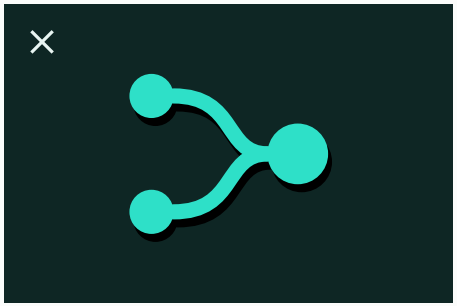

03

Don’t use off-palette colors

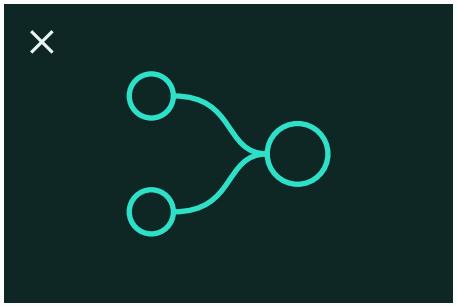

04

Don’t use low-contrast backgrounds

05

Don’t add shadows or glows

06

Don’t outline the symbol

07

Don’t rearrange the lockup

08

Don’t retype the wordmark

02

Color

One accent on a dark base. Teal is the only color for action and emphasis.

Core palette

Four colors carry the whole product. Teal appears sparingly so that it always means something.

ACCENT

Teal

Buttons, scores, active states, highlights

#2EE0C8

RGB 46 224 200

CMYK 79 0 11 12

Print values are approximate

BASE

Forest

Primary background and dark text

#0E2624

RGB 14 38 36

CMYK 63 0 5 85

Print values are approximate

TEXT & LIGHT

Mint

Text on dark, light surfaces, panels

#E8F5F2

RGB 232 245 242

CMYK 5 0 1 4

Print values are approximate

LAYER

Surface

Cards, inputs and raised panels

#153532

RGB 21 53 50

CMYK 60 0 6 79

Print values are approximate

SUPPORTING TINTS

Muted mint

#9FC4BD Secondary text on dark

Line

#1F4A45 Dividers, tags, meters

Balance & accessibility

Use the palette in these proportions, and only the pairings that pass WCAG contrast.

PROPORTION

Forest 60% · Surface 25% · Mint 10% · Teal 5%

TEXT AND BACKGROUND PAIRINGS

	Forest	Surface	Teal	Mint
Mint	Aa 14.2:1 AAA	Aa 11.8:1 AAA	Aa 1.5:1 Fail	—
Teal	Aa 9.5:1 AAA	Aa 7.9:1 AAA	—	Aa 1.5:1 Fail
Forest	—	Aa 1.2:1 Fail	Aa 9.5:1 AAA	Aa 14.2:1 AAA
Muted mint	Aa 8.4:1 AAA	Aa 7.0:1 AA	Aa 1.1:1 Fail	Aa 1.7:1 Fail

Teal is a fill and accent color only. Never set body text in Teal on Mint or white; use Forest instead.

Typography

03

Characterful headings, calm and legible interface text.

Typefaces

Two families from Google Fonts, both free for commercial use.

Aa

HEADINGS

Bricolage Grotesque

ExtraBold 800 for display. Bold 700 for headings. Tight tracking, about −2%.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789 & @ # % →

Aa

BODY AND INTERFACE

Figtree

Regular 400 for body. Medium 500 and SemiBold 600 for labels and buttons.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789 & @ # % →

Type hierarchy

One clear scale. Sizes are in px for product; scale proportionally for print.

EYEBROW LABEL

Code with the right people.

Find a project that fits

Match by stack and availability

DevSync pairs developers with open-source projects based on the skills they have and the work they want to do next. Every suggestion shows why it matched.

Eyebrow	Figtree 600 caps	11	14	+12%

04

App icon & favicon

The symbol, packaged for every screen it lives on.

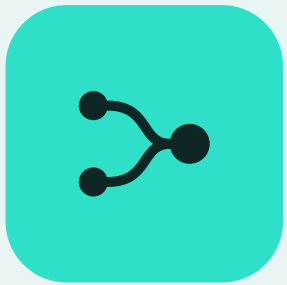

App icon

Dark by default, with Teal for Pro. Android uses the round adaptive version.

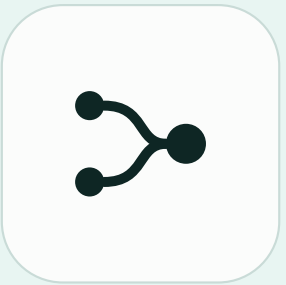

Default

Pro alternate

Android adaptive

Light

SHAPE	Rounded square, corner radius 22% of the width. Android uses a full circle.
SYMBOL	The symbol fills roughly 64% of the tile width and is optically centered.
COLOR	Surface tile with Teal symbol by default. Teal tile with Forest symbol for Pro.
SAFE ZONE	Keep the symbol inside the dashed circle so system masks never crop it.

Favicon

Symbol only. At 16 to 48 px it is drawn slightly bolder so the paths stay legible.

DELIVERED FILES

favicon.svg	Scalable, modern browsers
favicon.ico	16, 32 and 48 px, legacy
favicon-16 / 32 / 48.png	Tabs and bookmarks
apple-touch-icon.png	180 px, iOS home screen
favicon-512.png	App stores and PWA

GUIDANCE

Always use the symbol alone; the wordmark is unreadable at tab size.

Do not add borders, shadows or extra padding.

Provide the SVG first. Browsers pick it over the raster files.

HTML

```
<link rel="icon" href="/favicon.svg"
      type="image/svg+xml">
<link rel="icon" href="/favicon.ico"
      sizes="any">
<link rel="apple-touch-icon"
      href="/apple-touch-icon.png">
```

05

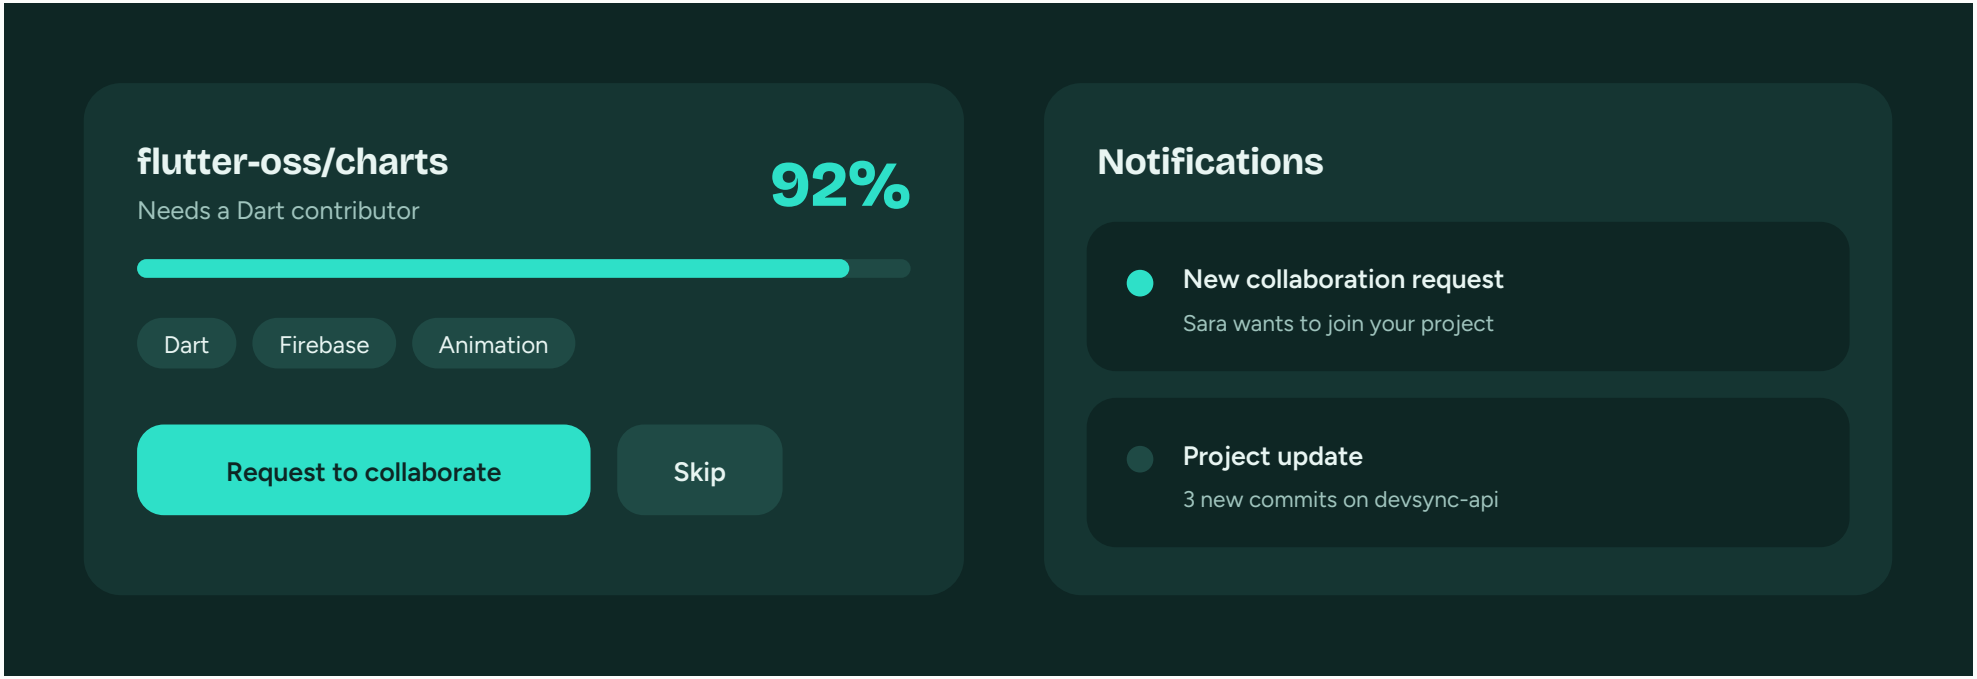

Interface components

How the identity translates into the DevSync app: surfaces, controls and status.

Cards & notifications

Cards sit on Surface with generous padding. Teal marks the one thing that matters.

RADIUS

Cards 18 px, buttons 12 px, tags fully round.

PADDING

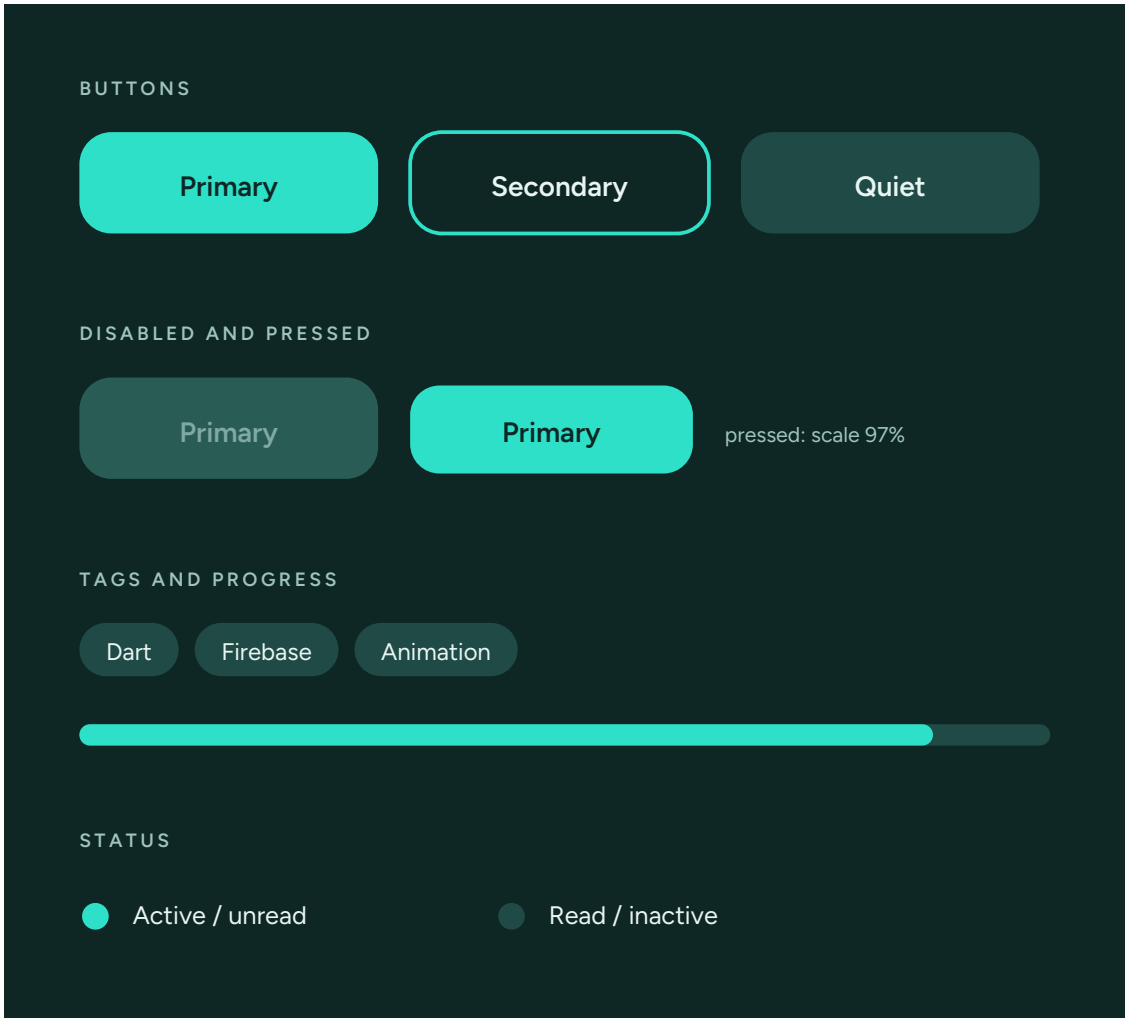

20 px inside cards, 12 to 14 px for nested rows.

EMPHASIS

Teal for the score, the primary action and unread state only.

Controls & status

Buttons, tags and progress follow the same two-color logic.

Primary button

Teal fill, Forest label. One per view.

Secondary button

Transparent, 1.5 px Teal outline, Mint label.

Quiet button

Line fill, Mint label, for low-priority actions.

Tags

Line fill, Mint 13 px text, pill shape.

Progress

8 px track in Line, Teal fill.

Status dot

Teal for active, Line for read or inactive.

Free vs Pro

Free: Surface card, Teal icon. Pro: Teal card, Forest icon.

06

Voice & tone

How DevSync speaks: direct, encouraging and fluent in developer language.

How we write

Short, specific and respectful of people’s time.

01

Direct

Short sentences, active verbs. Say what happens next.

02

Encouraging

Celebrate progress. Never pressure or shame.

03

Developer-fluent

Use real terms. Skip buzzwords and hype.

SAY THIS	NOT THIS
Request to collaborate	~~Submit your application for consideration~~
Your first match is ready	~~Congratulations!!! You have unlocked a match~~
3 new commits on devsync-api	~~Exciting activity happened on your repo~~
Sara wants to join your project	~~You have 1 new pending notification~~

Code with the right people.
